BẠN UỐNG TỐI LÁI

You drink, I drive 24/7 (App Store)

OPERATING PHILOSOPHY

> ***"Partnering with businesses for prosperity."***

HTSoftTech recognizes that technology is not just a tool, but also a platform that helps businesses optimize processes, enhance customer experience, manage data, and achieve sustainable growth in the digital environment.

HTSoftTech
INNOVATIVE SOFTWARE SOLUTIONS
VIETNAM

CREATING VALUE
SUSTAINABILITY
BY TECHNOLOGY

VISION

Our goal is to become a reliable technology solution provider, partnering with businesses in the process of digitizing operations, building online platforms, and developing digital ecosystems.

HTSoftTech aims to create not just websites or applications, but systems that are stable, flexibly integrated, and scalable to meet each stage of the client's development.

MISSION

Digitizing processes
Applying technology to reduce manual tasks and improve management efficiency.

Data connection
Building a centralized platform helps to manage and utilize data effectively.

Optimizing the user experience
Place the user at the center of the interface and functionality development process.

Partnering for Development
We don't stop at product delivery; we aim to provide support throughout the operation and expansion process.

CORE VALUES

01 QUALITY
Focus on UX/UI, performance, and testing before deployment.

02 SECURITY
Pay attention to data security and layers of protection during the system development process.

03 CREATIVE
Flexibly apply new technologies to each real-world problem.

04 ACCOMPANYING YOU
Building long-term partnerships with customers and partners.

05 EFFECTIVE
Technology must create measurable value for management and business operations.

INNOVATIVE SOFTWARE SOLUTIONS
VIETNAM

TECHNOLOGY CAPABILITIES & IMPLEMENTATION PROCESSES

FROM IDEA
TO THE FINISHED PRODUCT

HTSoftTech focuses on building products based on a combination of system architecture, interface, data, integration, and operations.

TECHNOLOGICAL CAPABILITIES

FRONT-END / UI React • Next.js • Responsive Web • UI/UX.	**DATABASE & DATA** The data system is centralized and synchronized in real time, depending on the project.
BACK-END & API Node.js • RESTful API • Microservices.	**CLOUD & SECURITY** Cloud Computing • SSL • WAF • Backup • Server Infrastructure.
MOBILE iOS • Android • Flutter.	**INTEGRATION** Payment Gateway • GPS • SMS • Zalo • Camera • Time Attendance Machine • Third-party APIs

02 6-STEP PROCESS

01 RECEIPT
Discuss project objectives, needs, and scope.

02 ANALYSIS
Analyze business processes, users, and workflows.

03 SOLUTION
Develop the architecture, functions, and implementation plan.

04 UI/UX & DEVELOP
Interface design and system programming.

05 TESTING & GO-LIVE
Functional and performance testing, and formal deployment.

06 ACCOMPANYING YOU
Monitoring, technical support, maintenance, and new feature development.

A GOOD SYSTEM IS NOT JUST ABOUT "RUNNING".

It needs to be user-friendly, stable, secure, easy to administer, integrateable, and readily scalable.

PROJECT / CASE STUDY

YOU DRINK, I DRIVE 24/7

APP CONNECTING DRIVER SERVICES

"You Drink, I Drive 24/7" is a Travel app on the App Store that aims to connect users with drivers when they need someone to drive for them, especially in situations where the user is not suitable to drive themselves.

PROBLEM

Building a simple driver-booking experience that helps users:

01 FIND A DRIVER
Find a suitable driver in the surrounding area.

02 REAL-TIME MONITORING
Track the driver's location on the map as they travel to the pickup point.

03 REFERENCE REVIEWS
Check driver information and ratings before using the service.

04 CHOOSE YOUR TRANSPORTATION OPTIONS
Choose the mode of transportation that best suits your travel needs.

FEATURES SYSTEM

Book a driver quickly

- GPS positioning
- Online map
- Pickup and drop-off points
- Track your journey
- Driver's profile
- Driver rating
- Notification
- Account management
- Optional stops
- Book a driver by appointment.

The app has undergone several upgrades since October 2024, with updates related to location, maps, trip status, performance, and the pickup/drop-off point entry experience.

VALUE OF THE SOLUTION

QUICK
Shorten the process of finding and connecting with drivers.

TRANSPARENT
Users can refer to information and reviews before making a choice.

INTUITIVE
Track the driver's movements using a map.

FLEXIBLE
We support both immediate bookings and scheduled appointments.

PRODUCT DEVELOPMENT THINKING

User Experience + **Location Technology** + **Real-time Data** + **Operational System**

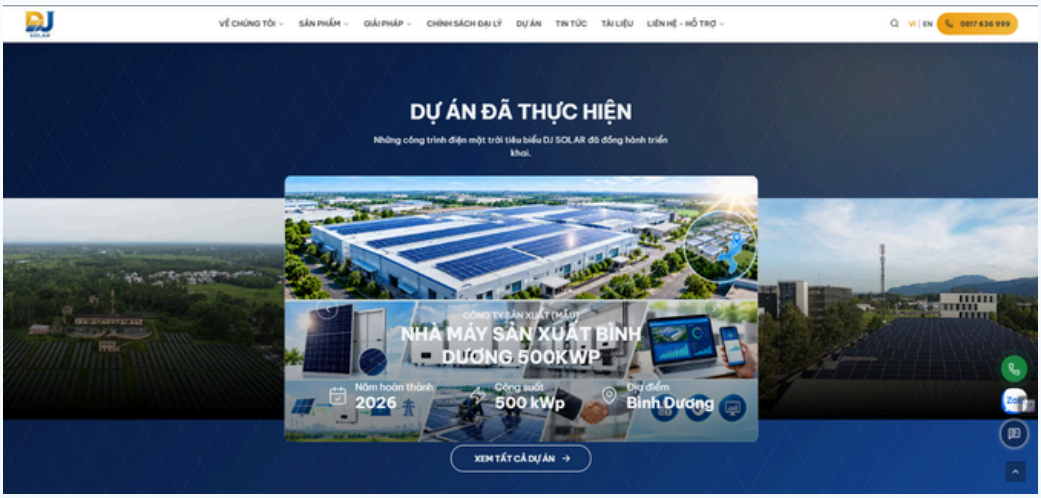

Creating a platform that connects Users – Drivers – Trips – Operational Data.
